

**LIFE FLOATS & BUOYANT APPARATUSES, THE
WORLD'S FINEST - U.S. COAST GUARD APPROVED!**

CHECK THESE EXCLUSIVE JIM BUOY FEATURES . . .

- ✓ Tough resilient vinyl surface — easily boarded, comfortable in the water — no hard surfaces.
- ✓ Light weight yet easily exceeds the most severe U.S.C.G. tests. Ease of handling is one of our most valued features.
- ✓ Less storage space required for equal raft capacity; compare dimensions . . . you'll be amazed!
- ✓ No exposed metal hardware — all beackets secured inside the float body.
- ✓ Double webbing, sunlight or weather never reaches supporting beackets.
- ✓ Solid closed-cell plastic throughout; bullet holes would have only a minimal effect on buoyancy. Will not rot or mildew.

1200 SERIES
LIFE FLOAT

NEW! Now with GRS!

This incorporates a *Glass Reinforced Surface* into the regular vinyl surface and produces an almost impenetrable skin yet remains slightly resilient. When ordering simply add GRS to the model No., i.e. No. 1208-GRS.

IMPORTANT: All rafts are now required to have retroreflective tape per U.S.C.G. Requirement.

OFFICIAL U.S. COAST GUARD REQUIREMENTS

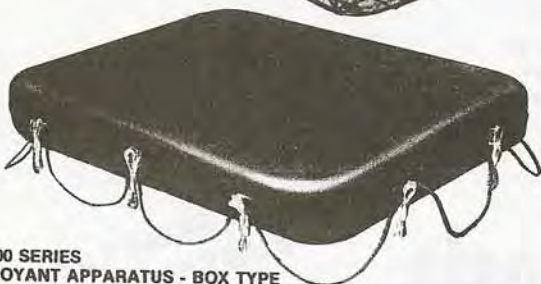

180.10—5 Requirements for vessels in ocean or coastwise service

180.10—5 (a) Except as otherwise provided in this section, vessels in ocean service shall carry sufficient lifefloats for all persons on board, and vessels in coastwise service shall carry sufficient lifefloats or buoyant apparatus for all persons on board.

180.10—5 (a) (1) Vessels whose routes are restricted to 20 miles from a harbor of

180.10—5 (a) (2) For vessels operating not more than one mile from land, the Officer in Charge, Marine Inspection, may permit operation with reduced amounts of lifefloats or buoyant apparatus when in his opinion it is safe to do so. In permitting such reduction the Officer in Charge, Marine Inspection, shall consider the vessel, its scope of operation and the hazards of the route.
