

TYPE V INDUSTRIAL WORK VESTS

Type V — Any approved device designed for a special and restricted use. **MEETS ALL OSHA REGULATIONS.**

Safeguard Workhorse

All Units U.S.C.G. Approval 160.053/66/0

All WORKHORSE Vest's are U.S.C.G. Approved Type V PFD's. They are specifically designed to provide Extra Flotation (in excess of 17 1/2 Lbs.) for safety and still allow complete mobility to workmen on or near the water. Now available in extra large sizes and in styles with pockets. Special built in collar and neck design protects workers carrying equipment on shoulders. Cover is made of coated polyester or coated nylon fabric in bright orange with reinforced edge trim of black polypropylene webbing. Heavy duty quick release buckles allow easy donning and adjustment. No hanging straps to catch. Jacket design provides superior hypothermia protection both in and out of water. All units complete with reflective tape patches on front and back.
